DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because of legal phraseology "comprising" as recited in line 1, such terminology should be avoided in the abstract. Correction is required. See MPEP § 608.01(b).

Claim Objections

2. Claim 11 is objected to because of the following informalities: claim 11, the claimed limitation "a cartridge" as recited in line 3, and "a cartridge" as recited in line 5, are vague and unclear because it is not clear if the claimed limitation in line 5, "a cartridge" is the same as the claimed limitation noted in line 3 above. Applicant should restructure the claimed language to prevent double inclusion throughout the claims. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Sarnoff 2,956,563.

Sarnoff discloses a front loading injection system (col. 1, ll. 15-22), which comprises a housing (1) for a dose setting and injection part, the housing comprising a longitudinal axis and comprising a front section (23) for receiving a cartridge (4) and a

rear section comprising a window for displaying the size of a set dose (col. 7, ll. 43-75 onto col. 8, ll. 1-5), the cartridge is axially insertable into the front of the housing as seen in Figure 1, a closing member (5) that moves perpendicular to the longitudinal axis and moves radially inward to engage the cartridge, thereby holding the cartridge in the housing and preventing axially movement of the cartridge as seen in Figure 8, wherein the window displaying the size of the set dose is located in an axial position that is proximal to the cartridge so that a part of the housing axially separates the window from the front section of the housing that receives the cartridge as seen in Figures 8-10, a moveable piston (16), a needle (21), a cartridge holder (18).

Allowable Subject Matter

5. Claims 7,9-10 are allowed.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
